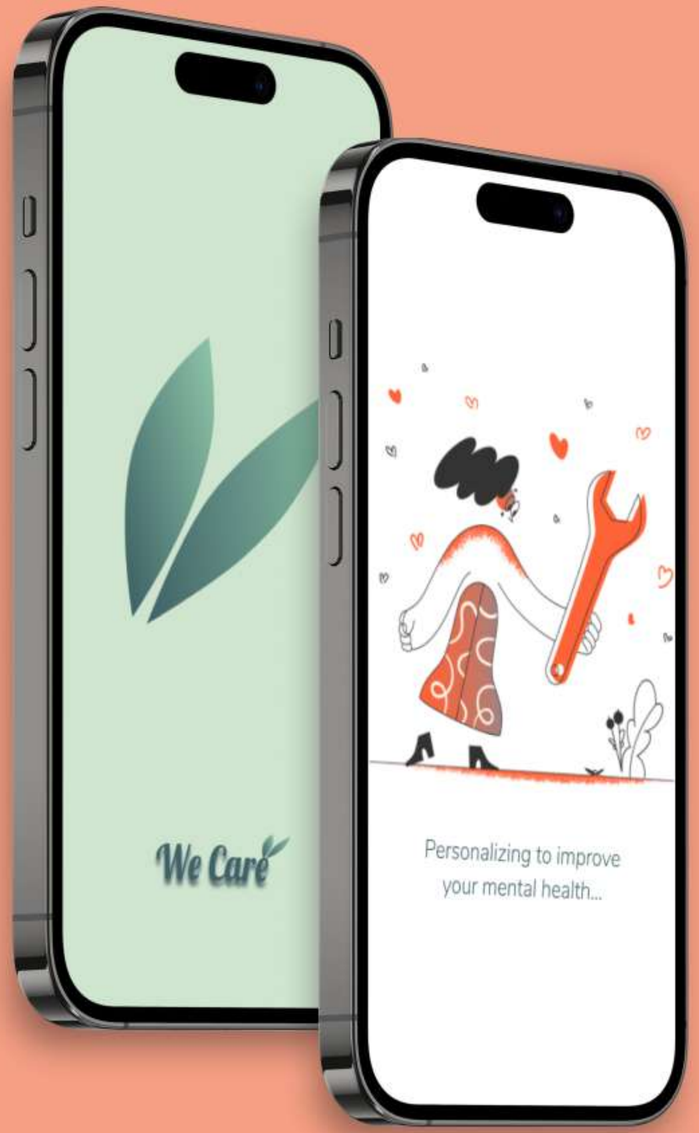
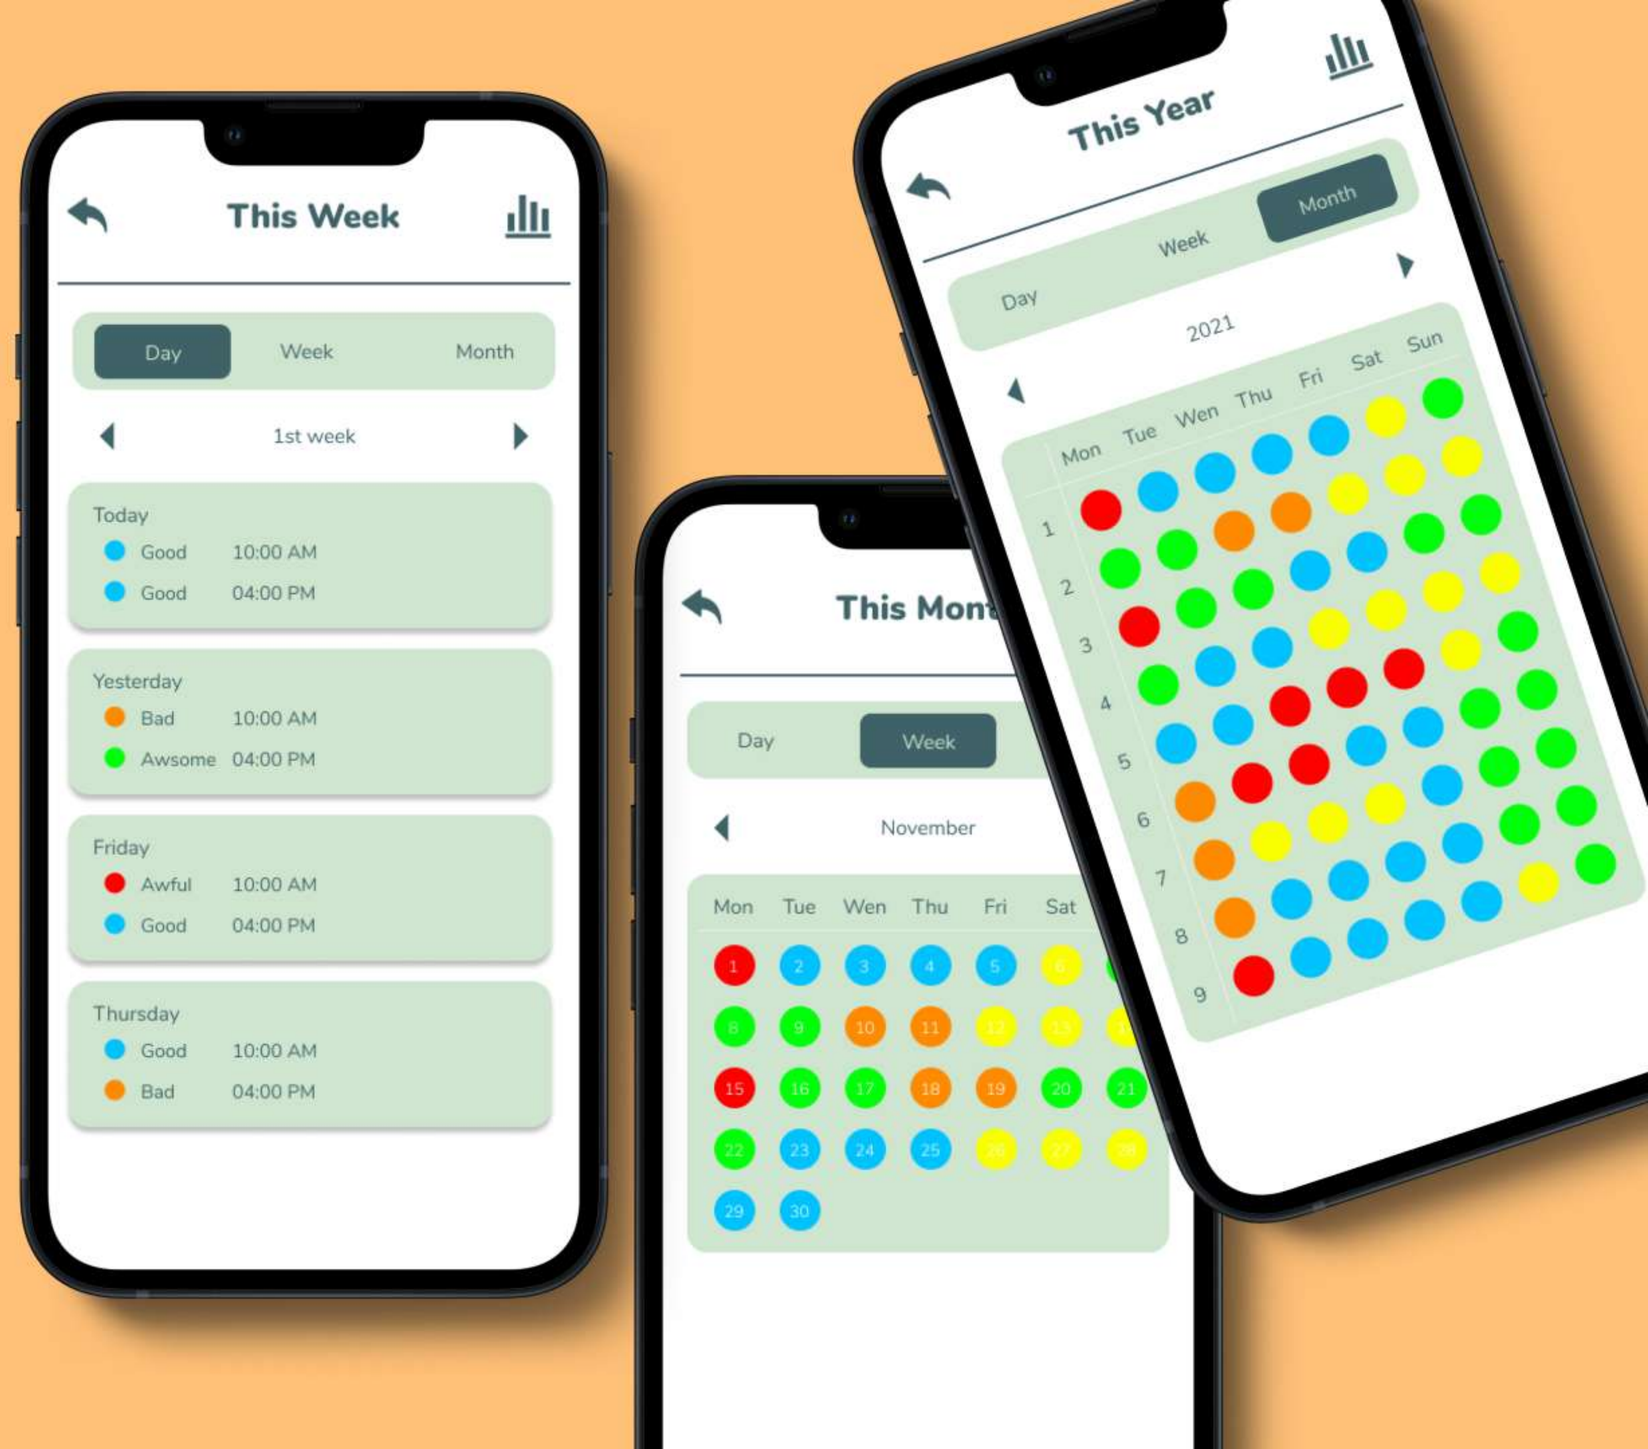
We Care

Mobile App Design



Overview

We Care is an application to help people in dealing their phase in Quarter Life Crisis. This application relates to mental health in the form of consultations, information related to mental health, meditation content, podcasts, and calming sounds with the intention that people can get through the quarter-life crisis phase and help them in dealing with it.



Overview

LetsTrip is an application to provide ticket sales of attractions in specific locales. LetsTrip helps people to book tickets easily anywhere.
